## The Role of the Ministry of Education

1. **List of Private Schools on the Ministry of Education's website** – The Ministry of Education provides a list of all private elementary and secondary schools currently operating in Ontario. The list includes general information about each school, such as:

- religious affiliation
- the availability of residential facilities
- if the school is authorized to grant credits toward the OSSD

The Minister of Education has the sole authority to determine the courses of study that a student must complete in order to obtain the OSSD. Private schools operate independently from the ministry so having a school on the ministry's website does not mean the ministry endorses that school.

- provincial
- care, treatment and correctional facilities
- summer and night schools
- adult continuing education day schools
